DRILLER'S TV

DESCRIPTION

EFC's Driller's TV Systems are designed specifically for the harsh oil and gas environment. Each tailor-made system can be as comprehensive as necessary and progressively expanded, in-line with operational requirements.

Camera controls and select switches are panel mounted. Alternatively the components can be mounted on a small stainless steel plate, ready for location in convenient area.

TFT Monitors are becoming increasingly popular as they are space efficient, have shallow enclosures, provide increased visibility and have high bright screens.

Hazardous Area Internet TV Systems provide an IP address allowing video from remote rig sites to be accessed and viewed by headquarters and onshore offices.
