

BULK TANK MONITORING SYSTEM

DELUGE CONTROL EMERGENCY SHUTDOWN FIRE & GAS DETECTION BULK TANK GA/PA ENGINE ROOM ALARM

Bulk Tank Mud & Cement Monitoring and Control Panels are supplied to rigs on a global basis.

Typically panels are for safe area operation, however, as per all EFC Group systems Zone 1 hazardous area systems are available as required.

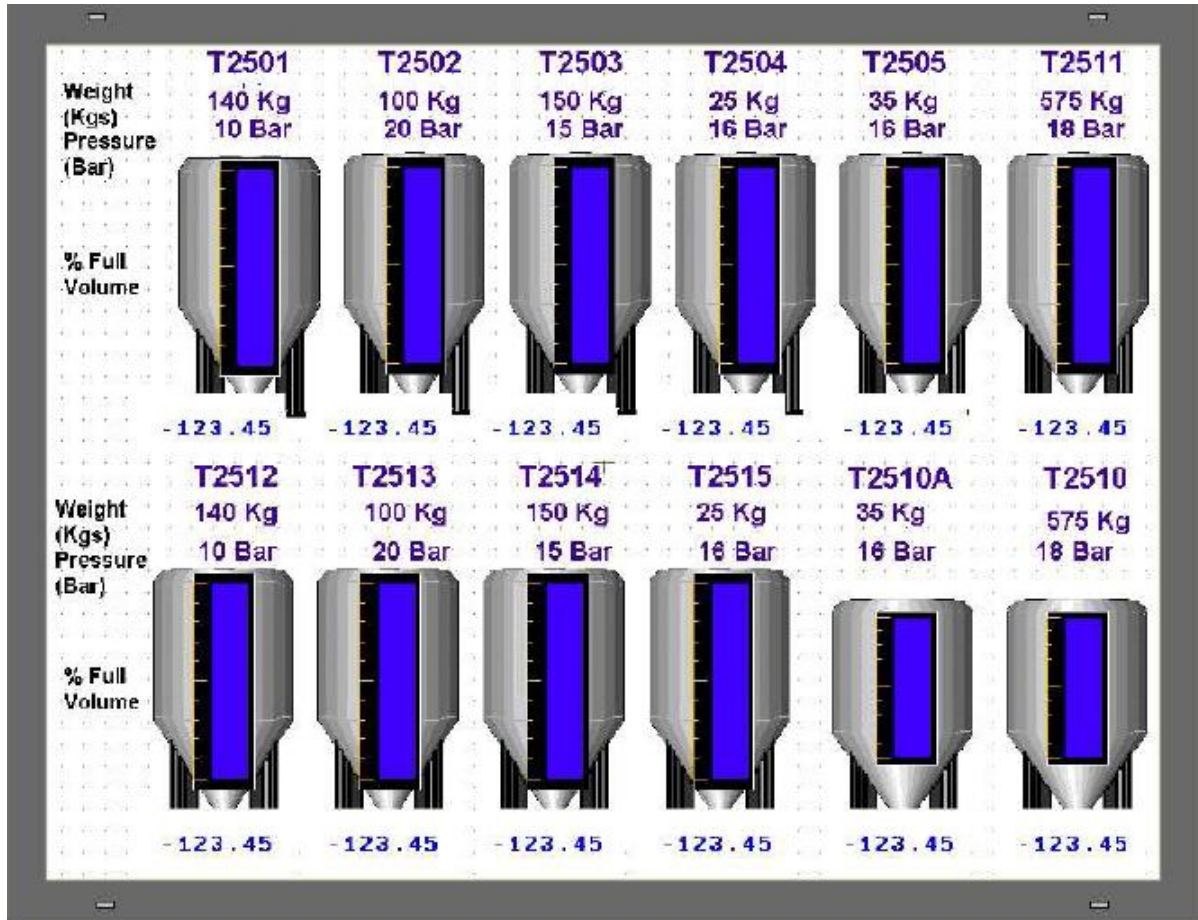

An example of a stainless steel Bulk Tank panel is pictured above. This includes:

- Mimic arrangement, with different colours for air lines and for powder lines and tanks.
- 52-off two-position switches, the position of which indicate the status of each pneumatically actuated valve.
- 6-off LED digital displays of individual tank weights
- 6-off LED digital displays of individual tank pressures
- 8-off high level alarm indications for each tank
